

About NXR Professional Ranges

Dvorson's Food Service Equipment Inc. now carries NXR Professional Ranges. The high quality, heavy-duty components in the NXR Ranges are perfectly suited to the high performance cooking that our residential customers expect.

Company Profile

Duro Corporation (NXR) is based in Southern California. They own quality controlled factories in Asia where product assembly occurs. Duro Corporation's parent company is one of the largest manufacturers of stainless steel BBQ's in the world. The Duro Corporation segment of the company was started specifically to bring professional style ranges, previously only affordable to the ultra-rich, to a price point suitable to the average American household.

Manufacturing

Like many of today's products, NXR is not manufactured in any one country, it is truly an international product. For example the cook top burners, valves and ignition come from Isphording, located in Attendorm, Germany. The gas safety valves and oven and griddle thermostats are sourced from Invensys in the United States. The heavy-duty door hinge is from NuovaStar, located in Italy. Oven and broiler igniters are from Saint Gobain in Milford, New Hampshire. Automatic reignition spark modules are sourced from Tytronics in Australia. The convection fan and motor are from EBM-PAPST in Germany.

These parts are collected at Duro Corporation's factories in Asia for assembly, and the finished product is shipped to Duro Corporation's headquarters in California. Dvorson's ships NXR Professional Ranges world-wide from our warehouses in California (free shipping to the contiguous United States on all NXR Ranges).

Service

Warranty service for NXR Ranges is provided by the Adco service network. Adco, the service provider for NXR and other prestigious brands such as Wolf, is a national network of local servicers. For over twenty years Adco has supplied support services for premium appliance manufacturers throughout the United States.
